

# About RIPPLE Africa

We are all about empowering communities in the Nkhata Bay District in Malawi to achieve a sustainable future by providing a hand UP, not a hand out.

## Our Core Values

- Long term commitment to local communities.
- Sustainable and simple community led projects.
- We are open and honest about our successes and failures.

## How We Do It

- We run many projects in a small area, working closely with the local communities, Chiefs, and District government departments, empowering local communities to be the solution.
- We have 150 Malawian staff and 2,000 local Malawians working on our projects.
- We use simple, low tech and innovative solutions.
- We are passionate and hardworking, but we also have fun!

## What We Do

- We run eight pre-schools, support five primary schools, and we have built a secondary school.
- We help communities to conserve the fish and forests.
- We have helped communities to plant over four million trees.
- We are working with 40,000 households to provide a fuel-efficient cookstove, saving 80,000 bundles of wood per week.
- We have built a local health dispensary and have undertaken other building projects at other local health centres and hospitals.

All this has been made possible by the generous support of our wonderful donors.
