

# BASIC DOUBLE CLASSROOM BLOCK

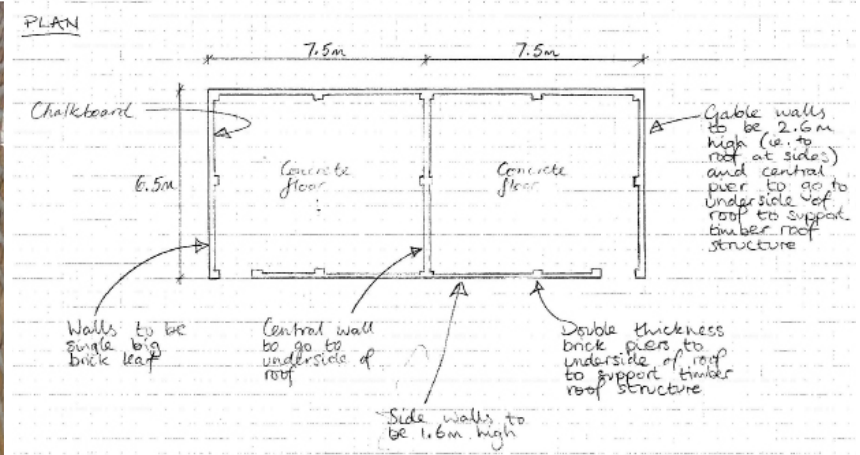

Classrooms are so overcrowded with up to 150 students in one class. The basic double classroom block is made of bricks with an iron sheet roof. It provides additional space for teaching and can replace old wooden and thatch structures. It is simple to build, very low-cost and will last for at least 25 years.

## Before - Wooden and thatch classrooms

Old wooden and thatch classrooms can be replaced

## After - New bright basic classrooms - Children and teachers love them!

New Basic Double Classroom Block
