

# Kapanda Secondary School

It's not only the end of an academic year but the end of 12 years at school for Form Four students. This year Kapanda Secondary School have 54 students graduating, seven of whom are sponsored through RIPPLE Africa's scholarship scheme. Eugen, Lyding, Landie, Levison, Wisdom, Brian and Mackson are taking their final examinations from 22nd June to 5th July but before the pressure begins, they celebrated their graduation on Saturday 17th June.

## Mackson Longwe

This year at school was good as we learnt a lot and had sports activities. It is the same as before as the biggest challenge is lack of books, pens, etc. My favourite subjects are mathematics, physical science, agriculture, biology and English. This year I learnt about good behaviour and skills on how to solve problems in life. I want to go to university and become an engineer but I will have to pass my exam. I will make sure I find a small job to make some money to improve my living standard.

## Brian Manda

School is very good and I like speaking English. But there is problems because there are lack of teachers. I also struggle at home to read because there is a lot of work to do. I understand the importance of education because visitors to the school have told me so, so I know I have to work hard, respect people and also dress smart and behave. I am finishing school now but I hope to get good results so that I can be a doctor as I like biology and physical science.

## Eugen Phiri

School this year has been nice and cool except for the strike at school which means I haven't learnt the whole syllabus. I have learnt to face problems head on whenever there is a challenge in life. When I graduate this year I want to take a course in engineering as my favourite subjects are biology, physics and chemistry.

## Wisdom Jumbo

The school year has been very fine, and I have enjoyed sport activities with my friends. At school I find that sometimes we get unmeaningful detentions but I have learnt a lot about respect. When I am home, the biggest challenge is the lack of time to study. My favourite subject has been biology and now that I am graduating, I hope I will be able to train to be a teacher.

### Levison Gwada

I am very happy at school but I do arrive late sometimes because I live a distance from the school. English is my favourite subject at school and this year I have learnt Romeo and Juliet. My plan is to go to university to study linguistics.

### Lyding Manda

School has been very fantastic but I am going to finish form 4 now and I don't know how to operate a computer. I would like to learn. I would also like to get to university to study economics. The biggest thing I have improved on this year is my English speaking.
